I am an experienced full-stack developer, extremely committed in delivering high-quality and responsive web application systems. I love keeping informed on the latest technological trends and newest frameworks; in doing so I ensure my code complies with web standards and follows the latest industry techniques (HTML5/ES6/CSS3). My competencies range from designing user-friendly front-end systems, database management, and in developing the appropriate background processes necessary to deliver exceptional digital solutions.
AREAS OF EXPERTISE

Ruby Rails HTML5 CSS3 JavaScript

Next.js React PostgreSQL git RubyMine

PROFESSIONAL EXPERIENCE

Teaching Assistant

Le Wagon Berlin

12/2020 - today

Achievements

- Serve as the point of contact during Project Weeks for 3 consecutive batches (150+ students) within the Berlin chapter of le Wagon
- Ensure students adhere to MVC pattern (tasks included validation of DB schema, router, model, and controller configuration)
- Provide continuous open-ended programming support to students via a ticketing system (10+ tickets daily)

sebibasti.dev

03/2021 - today

Achievements

- Custom made blog feature (Rails API as backend, pagination, serialization, token based encryption, unit tests with FactoryBot and RSpec)
- Frontend in Next.js & React

Website - Wandgestaltung Reinl

09/2020 - today

Achievements

- Designed a digital business card with a minimalistic layout.
- Implemented carousel-like picture galleries for selected reference projects.
- Search engine optimization for visibility.

Jamable

06/2020 - 07/2020
